

During the onboarding process its failing a lot with the location thing and is hard to navigate:

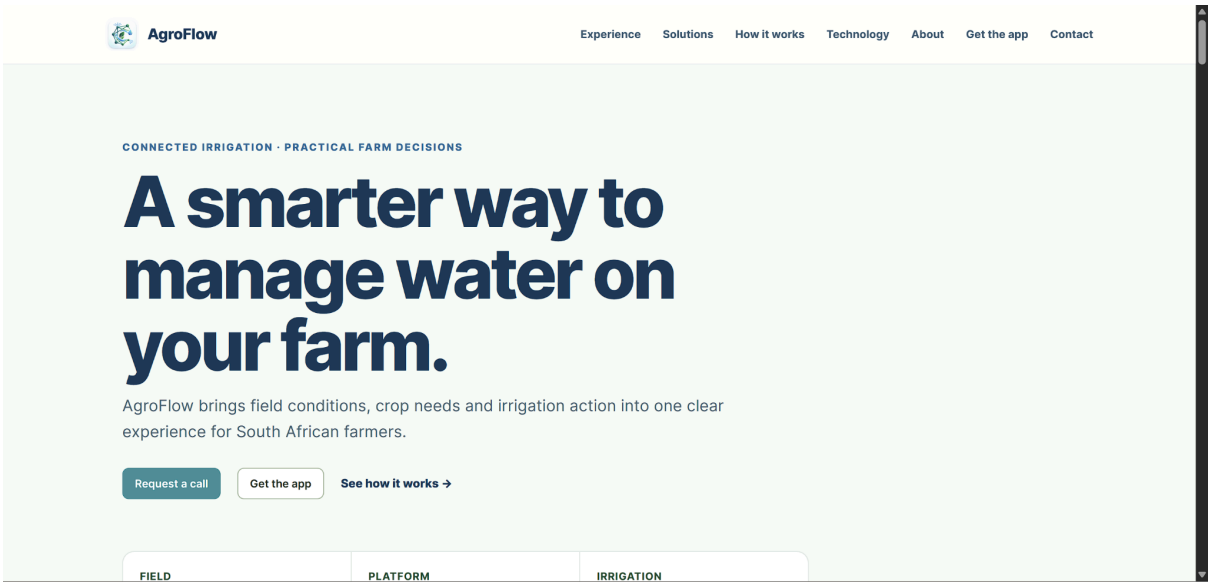

On the wizard oon the app :
Once you complete a step it must move the button

App wizard misbehaves and glitches fr
Onboarding should be betttwer communicated at what point is what being done where is everything etc etc

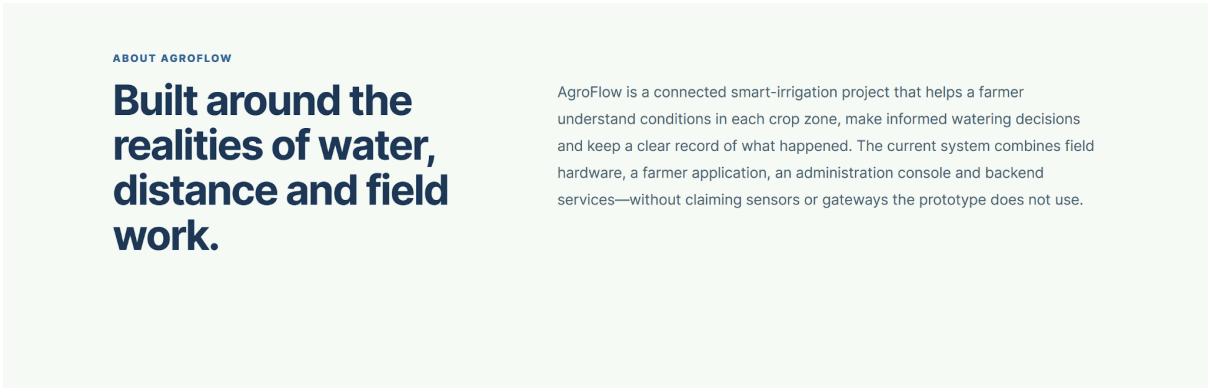

Wheres the logo :

Make all these different pages : as in the hadins not one long scrollable thing

Add a better about :

Additional notes : add borders or smth to the ui especially veercel app , things shoulndt just be there there must be scalability and stuff like adjusts to different sizes and also just doesnt hug the borders fr
